RUSSIA'S NEW PREMIER; WHAT CHANGES MEAN

Indications Are Prince Golitzine's Appointment May Represent Victory for Progressive Elements - Uncertainty Exists

Special Cable to The Christian Science Monitor from its European Bureau LONDON, England (Thursday)— There is little information from Rusla as to the meaning of the latest of changes in the Government. These changes have followed in rapid succession. M. Trepoff, who has now resigned the premiership and Ministry of Communications, was in office little more than six weeks, succeeding M. Stürmer who had been Premier for nine months, and who fell because of his supposed complicity in secrezed but influential personages in Russia and Germany. These negotiations proved entirely fruitless in the face of he complete unity of the mass of the Russian people, its Army and most of its political leaders with their

In the absence of further information it is uncertain whether Prince Golitzine's appointment represents a victory for the Progressive elements not; but such evidence as there is pints to this. In the Council of the Empire, recently, when the question of "dark forces" was debated and a strong resolution was passed, he delivered a very courageous and out-spoken speech expressing himself du-bious as to whether the Trepoff Gov-ernment could, in fact, pass from words to deeds. He was doubtful, he words to deeds. He was doubtful, he said, while the system of nominating SPEAKS ON THE elements in Russia, generally, is, of course, for a ministry responsible to ministers remained as it was. The demand of the Duma and Progressive the people, or at least working closely and harmoniously with the Zemstvos and municipal councils.

In his speech, Prince Golitzine de-manded that M. Trepoff should say

whether he had power to carry out reforms without interference by the "dark forces," by which he meant to include, of course, Gregory Ras-putin, assassinated shortly afterwards.

Prince Golitzine had not, he said, men, enjoying the confidence of the country, and free from the interference of "dark forces."

Deschanel declared today in opening the Chamber of Deputies.

In his address he hinted at what the

PROGRESS OF **AGRICULTURE IN** SOUTH AFRICA

Primitive Methods Replaced by Self-Binder and Up-to-Date Threshing Machine - Cape Fruit Sold in U. S. Markets

Special to The Christian Science Monitor CHICAGO, Ill. - Theo G. W. teinecke of the School of Agriculture, Potchefstroom, Transvasi, South Africa, now at the University of Illinois, College of Agriculture, Champaign, Ill., in an outline of the progress of lture in South Africa, prepared for The Christian Science Monitor,

'The Union of South Africa is a ter-It is a self-governing British dominon exactly analagous to Canada, Australia and New Zealand, made up of old Cape Colony and British Bech-

"The rainfall throughout South Africa varies considerably from the West to the East Coast. There is a gradual increase in the precipitation, from five to ten inches in the extreme, west, through 18 to 30 inches in the middle territories, to 50 inches on the East Coast. In the southern and southwestern districts of the Cape Province the rain falls during the winter months, April to September; the summer months, October to March, being comparatively dry. In the Transvaal, Free State and Natal, the eastern and midland districts of the Cape Province the seasons of rainfall are exactly

"Agriculture has been one of the main industries in South Africa since the earliest time. Australia made her first importations of merino sheep from the Cape Colony. The British army in India about the '60s looked to South Africa for her supply of cavhorses. Although the type of Cape horse or Boer horse famous then as a cavalry remount was almost stamped out by the Anglo-Boer War, the rolling plains of the Free State the high veldt of the Transvaal still produce a similar type of horse, except that he has more English thoroughbred than Arab blood in him now. The writer, from his experience in the recent South African campaigns, can testify to the fact that the Boer horse is still unequaled at home as a cavalry remount—and as a bucker!

'The country back of Cape Town for a radius of a hundred miles or so s the oldest, agriculturally, within the of the white man. This area, called the Western Province of the Cape, has been devoted to mixed farmng and the growing of wheat since days of the first Dutch settlers in 1652. The wine industry, which is confined to this part of the Union, dates back to 1653, when the vine was inuced from Germany. The French guenots, from whom so many of the Dutch South Africans are descended, arrived from southern France in 1685. ev brought with them training in the business. There was a marked deterioration in the product during the the beginning of the present one.

"Primitive methods of sowing, harvesting and threshing the wheat crop upon our inland and coastal waters, in were in vogue up to 16 or 17 years ago. order that the useless expenditures of The cutting of the crop by 'spans' of no value to commerce may be prenative boys (gangs of Negroes) was vented. a universal custom, and the writer has himself assisted in the primitive meth- sider the report made by its Committee sold in the towns and cities that there od of threshing wheat by driving a on Daylight Saving. Certain parts of the Midlands and whole of the Northwestern districts of the Cape Province constitute the arid portions of the Union of South Africa. This arid tract, called the 'Karroo', is essentially devoted to the 'Karroo', is essentially devoted to pastoral pursuits. Here the wild ostrich still roams, and herds of springbok and other antelope are common. The country is but sparsely grassed. It supports the growth of a variety of nutritious ahrubs, however, such as the 'brakbosch' (Salt bush), 'ganna', 'hlbo' and others on which here not

lead, in addition to his horses, cattle and ostriches. Wherever men have succeeded in exploiting the underground water supply or storing water, for the growing of alfalfa, the prosperity with ostrich and sheep farming has been phenomenal. As many as nine cuttings of alfalfa per annum have been obtained from some of these 'Karroo' soils under irrigation; with a maximum yield per cutting of two tons of hay per acre.

"Certain districts of the North West Cape are now producing large quantities of wheat. The work of the South African Milling Company on its estates near Calvinia may be cited. The Zak River, which overflows into this district annually, is made to cover the company's land. The ground is laid out somewhat on the scheme of the rice fields of California. Levees or low walls are thrown up every 200 to 800 yards, and the bottom of these shallow reservoirs are covered with water to a depth of six on eight inches, the excess water being drawn off at the highest point to fill up another of ritory covering 473,000 square miles. these checks. As soon as the water charged with its rich silt has soaked away, the land is plowed, worked up to a fine tilth, and then sown to wheat. tion amendment to the United States four provinces—the Transvaal, the Under this system, a 30-fold return Free State, Natal and the Cape Prov- of grain is common, even without any ince. The last named consists of the further irrigation. The South African Milling Company has been raising average annual crops of 200,000 bushels of wheat, and is extending the scope of its operations."

"The rapid increase in the number engaged in foreign trade, and one or of states and smaller units of governmore representatives of diplomatic ex- ment in adopting prohibition also has perience, the entire commission to be had a part in developing the conviction that national prohibition is dea real reform when once the hardheaded American voter sees where it is needed for the best interests of his country.

In a later editorial, Mr. Daniels' paper recounts the benefits brought to North Carolina by prohibition, and damages one of liquor's favorite arguments as follows:

"The favorite argument of the advointoxicating liquors, of the men who believe in the saloons, is that when the sale of intoxicants is forbidden by law that there is a great decrease in business. It is set out before the people of the State in which prohibition is urged that if there is no liquor will be a big loss of trade.

"There have been people in the past who have been caught by such flimsy, silly stuff, but happily such a class is becoming extinct, and there is being seen the practical application of the law and the results which follow when prohibition prevails in a state. The figures of the banks, the volume of business done in the various communities of "dry" states, show the truth of the declaration that prohibition helps business

"Since North Carolina entered the column of prohibition states there has come to the people here many faquiries concerning how prohibition worked, if business was hurt or helped, it being the desire of people in other places where prohibition was proposed to get at the facts of the effect on trade produced by prohibition. And the word has gone back that prohibition is helping North Carolina, that the State is growing far more prosperous because it has prohibition. Business has been increased in North Carolina by reason of prohibition. And crime has been decreased. These are two results which follow on prohibition, and both of these things mean for a better State. In those states where prohibition fights are states where pronintion lights are being made the people will find that it will prove a benefit if liquor is oast out. That has been demonstrated in North Carolina and it will be proved true in all parts of the country. The antiprohibition folks are fronting a day when there will be no liquor sold or manufactured within the law in this country, and that will be a great day for the people of the United States."

The State of Columbia, S. C., whose opinions may be said to be representative of the most thoughtful section of the southern press, points to the stu-pidity of the course the liquor interests are pursuing in this section. Says

the mails. On the other hand, they proceed to load the mails with posters and circulars which disgust those citizens who buy and drink liquors. The liquor houses in Florida, Tennessee and Maryland are flooding this State with price lists of whiskeys and wines as though they were convinced that at most they will have only a few more months in which to conduct their business and get rich off Leading Southern Newspapers South Carolinians. They are exerting themselves to the uttermost to make the gallon a month law offensive and -"Temperance Desires of to encourage the prohibitionists in their intention to reduce the amount

> vidual to a quart. "One reason that the prohibitionists are gaining everywhere is that the liquor business is steadily committing suicide. It never, never lets an opportunity escape to make itself nauseating. Not in the United-States has any other great business been conducted with such consistent stupidity. The minority of sensible wine and whiskey merchants are without influence in impressing the country.

organizations, was held recently at cuss "The War and Food Prices," Mr. was then carried. G. J. Wardle presiding. The chairman described it as unfortunate that FOREIGN TRADE that conference had coincided with a political crisis of the first magnitude, and that they found themselves confronted with a position in which there was no Government to appeal to-no authority to whom they could make their representations. The problem they had to consider was inseparably associated with the supremely important question of bringing the war to a successful conclusion. The issues were too great, and the occasion was too serious to be confused with party talk. It was, however, permissible to say that whoever might have overlooked the importance of this question of food prices, at any rate the Labor Party had never done so. So early as Aug. 5, 1914—the day after the war began—the Labor Party, through its secretary, called a conference, and they had since persistently and consistently acted in the 'spirit of the resolution then adopted." Their complaint now was that the steps taken by the Government had been belated. There was little evi-

They asked for a conservative policy, not a policy of drift. Mr. Clynes, M. P., moved the following resolution: This conference, representative of national labor, organized on both its wage-earning and consuming sides, declares that whilst regretting the long delay of the Government in taking action to prevent food prices rising, as they have steadily done during the past two years, it welcomes the steps that have now been taken, but is of opinion that they are inadequate, and that no policy will give public con-

dence in Government circles yet that

they were sufficiently seized of the im-

portance of vigorous and prompt ac-

tion to secure a sufficient and adequate

supply of food, at prices within the

reach of a majority of the population.

fidence unless it includes: (a) The purchase of all imported essential foodstuffs by the Government:

(b) The commandeering or controlling of home products, such as meat, wheat, oats, barley, potatoes and milk;

(c) The commandeering of ships and the controlling of freights and freight rates:

(d) The placing or the retail markets of all supplies so obtained and controlled at prices which will secure the full benefit of Government

(e) The organization and supervision of production so as to use home resources to the utmost, especially as regards agriculture, which, in the opinion of the conference, can be dealt with most effectively by fixing a guaranteed price to the producer on condition that satisfactory minimum rates of wages are also paid.

Further, in the opinion of the conference, the supply of coal and other necessaries of life should be dealt with by the Government on lines similar to those indicated above. Mr. Crooks, Darlington Cooperative

Society, declared that within walking Mr. T. E. Naylor, London Society of

A further addendum declared that the Government should approach the LONDON, England-A conference of governments of the Allied nations to 860 delegates from trade unions, co-operative societies, and other labor working on such lines that Allied purchases should be centralized, and competition between the Allies destroyed. the Central Hall, Westminster, to dis- The original resolution as amended

OF GREAT BRITAIN

Special to The Christian Science Monito LONDON, England-Great Britain's imports for the month of November, as cellency also touched upon the excepshown by the recent statement of the Board of Trade again exceed in value any previous month's total since the that I myself have known of more outbreak of war, the total for the 30 than one case when witnesses have days being £88,922,506, which repre- given evidence in court which differed sents an increase as compared with widely from that which they had fur-November, 1915, of £17,300,200 or 24.15 per cent. The exports at £42,-488,254 are £6,849,100 or 18.9 came up for trial." In such cases the per cent shead of the total a year ago. There is a drop in reexports of £1,-175,900 or 14.14 per cent. The unfavorable feature in the statement is the large increase in the trade volume against England, which is some £11,-627,000 greater than a year ago.

For the increase in imports, foodstuffs is responsible for over £7,-000,000, represented mostly by the rise in prices. Grain and flour importation were 1.660,000 cwts. less, but cost the country nearly £3,000,000 more. Raw materials imported also register large advances. Cotton is up £7,847,000, wool £1,027,000, and oil seeds, nuts, etc., £1,383,277. Manufactured articles are lower at £1,269,276, included in which is a gain of £704,088 in the import of leather manufactures which is offset by a drop of £7,48,820 in railway carriages, motors, etc.

There is a slight but welcome re duction in the exports of foodstuffs. Among the exports of raw materials, coal and coke show the biggest advance at £1,157,292. Wool shows a drop of £309,000. Exports of manufactured articles exhibit a total gain of £5,841,931, to which nearly all classes of manufactures contribute, cotton heading the list with a rise of £2,518,628 and woolen goods being next at £835,000.

For the eleven months ending Nov. 30, imports total £873,812,712, as against £782,899,373 a year ago and exports for the first 11 months of 1916 total £466,582,400, as against £350,- special funds of the department of the preceding year.

AGAIN VIEWED BY LORD CARMICHAEL

CALCUTTA, India—Lord Carmi-chael, the retiring Governor of Ben-thael, the retiring Governor of Benchalt the retiring Governor of Ben-gal, went down to the Police Training College at Surdah, a short while since, and again delivered an interesting speech on the much vexed police ques-tion. "Some day I hope," he remarked, towards the close of his address, "the Rengal police will be trusted by the Bengal police will be trusted by the Bengali people in a way which seems hardly possible now. That day will come when the people are convinced that the police are honest and upright; brave and intelligent. You can have no nobler aim than to hasten the arrival of that day. You can do no finer work for your country that no finer work for your country thah showing to your countrymen by your own individual example that Bengalis, even when they have to do disagreeable work and work which their countrymen are inclined to dislike them for doing, can yet act in accordance with those high ideals which the best Bengalis claim that their race has always upheld." In the course of his speech His Ex-

liability of evidence in this country. "I am sorry to say," nished to the police—for submission to the law officers before the case coct a false case deliberately, with the result that the severest strictures upon the conduct of the police eman-ate from the bench, and these are, of course, published broadcast, and tend to shake the public faith in the force. Such strictures, uttered in such circumstances, are, as His Excellency pointed out, embarrassing to the Government, no less than to the police.
"The establishment of implicit trust in one's judges is one of the first essentials of good administration, and it may well be that the executive Government ought to refrain from stating. publicly all that it knows about cases such as I have mentioned, lest it should seem to show want of confidence in the judiciary. When this happens, the police have to suffer in the public interest. But our police may rest assured that justice will be done them by the Government, and if the Government, for reasons which it thinks good, does not vindicate them publicly, they must accept it, as the police everywhere accept it, as part of the difficulties of the work they have undertaken."

HAWAIPS EDUCATION FUND By special correspondent of The Christian Science Monitor

HONOLULU, H. T .- Nearly \$1,000,-000 will be needed for the general and 699,817 in the corresponding period of public instruction for the biennial period which begins on Jan. 1, 1918.

FOR 4 CENTS IN STAMPS AND

We Will Send You

A PINT SAMPLE OF KNOX SPARKLING GELATINE WITH A HANDSOME ILLUSTRATED RECIPE BOOK

When you get it make a pint of this:

KNOX ORANGE JELLY

1 envelope Knox Sparkling Gelatine. 1/2 cup sugar. 1/2 cup orange juice. ¼ cup cold water. I cup boiling water. I tablespoonful lemon juice. Soak gelatine in cold water five minutes, and dissolve in boiling water. Add sugar and stir until dissolved; then add orange juice. Strain through cheese cloth into molds, first dipped in cold water, and chill. NOTE-If desired, add fresh or canned fruit or chopped nuts when making.

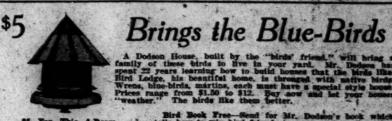

KNOX GELATINE, 800 Knox Avenue, JOHNSTOWN, N. Y.

Each package of Knox Gelatine makes four pints of jelly (serving twenty people)—four times as much as the ready prepared packages on the market that make but one pint. That is why Knox Gelatine is so economical.

Be sure you get the gelatine with K-N-O-X on the box, as is always sold under the guarantee of money back if not

ENTENTE GROUP URGED TO ACT **AGAINST GREECE**

Success of Germans in Rumania Emphasizes Need for Immediate Measures-Allies Advised to Strengthen Venizelists

By The Christian Science Monitor special correspondent lately in Greece

LONDON, England - It would be difficult to exaggerate the importance which is at present being attached to the development of the Greek situation. It is obviously impossible that the existing status quo should be indefinitely prolonged. As long ago as June last, members of the Greek genoral staff openly expressed their opinion that the Greek army was in a position to do considerable harm to the Allies, and they regarded with cant equanimity the possibility of their coast towns being bombarded

These opinions were expressed to the writer personally and were known to most journalists in Athens. There s nothing to add to the scanty decriptive telegrams which have arrived, but there can be no possible loubt that the Allies were tricked and that the King's henchmen have perpetrated a series of atrocities on compatriots, the partisans of

The Greeks are again in control of their telegraphy and the world is therefore only receiving what information the Royalist Government likes to be dispatched. On the other hand, little information is vouchsafed as to the communications which are now btedly taking place between the Allied Governments in respect to fur-

The facts of the situation are that whatever may have been the policy of King Constantine and his general staff in the past, they may now be counted among the enemies of the Entente. Their only means of salva-tion lies in a German victory. In the contrary case, the Venizelists may be expected to continue their struggle until they have cleared out the court previously done by the Allies. Therefore the King must desire a German victory, and it may be anticipated that he will do his best to assist the efforts of the Central Empires.

The question is no longer one of Greek politics, no longer one of attempting to safeguard the interests of an autocratic monarch. The Allies have to deal with a new enemy. A d but none the less important nsideration is the question of the nterests of the Venizelists in Greece. tecent events will, of course, have the same time, M. Venizelos has half the country with him, and a great

LAWS ILLINOIS WOMEN WISH TO SEE PASSED

Military Training in Public men's Club, discussed the work of the Schools Not Approved -Eight-Hour Day and Minimum Wage for Women Asked

Special to The Christian Science Monitor from its Western Bureau

CHICAGO, Ill.—Two years ago, just prior to the opening of the 1915 Legislature, the women of Illinois held a conference, at the invitation of Lieut .-Gov. Barratt O'Hara and a State commission, for the purpose of recommending measures to the General Assembly in which women were particularly interested. It was said to be the first gathering of the kind ever held in the United States, and the results in legislation, were pleasing to the women. A second session of the Illinois Woman's Legislative Congress has just been held, to inform the 1917 Legislature what women of the State would like to see made into law. This year's recommendations, like those of two years ago, are chiefly socializing. The assemblage was largely attendedfrom points without Chicago as well

Constitutional, social, educational and industrial legislation were considered in conferences covering the better part of three days, workers in these fields speaking or giving papers. Judges, aldermen, the superintendent of Chicago schools, several prominent labor union officials and leaders in the Illinois suffrage movement were among those addressing the congress. Military training in the public

schools failed of indorsement, and the vomen passed a recommendation specifically approving physical training other than military. Compulsory provision of free textbooks in the public schools also was unable to gain sufficient support. The free textbook resolution as adopted urged legislation allowing districts to give the books at option:

Among measures recommended and policy indorsed by the congress for the consideration of the Illinois Legislature were the following: Eighthour day for women; one day's rest in seven; legislation to permit zoning of cities as to building of factories and shops and providing playgrounds and school sites in the opening of new subdivisions; minimum wage for all women and minors, to be established by a wage board under a minimum wage commission; approval of amendments to the election and primary laws of the State providing that buyer of a vote shall be equally guilty with the seller; indorsement that a public official who wilfully refuses to enforce the law and carry Liberal Party meeting at the Reform that the strain and anxiety upon him club, Viscount Grey said he had felt must have been greater than upon junction shall be issued in connection with an industrial dispute upon son charged with contempt of court in connection with cases arising from absolutely necessary that it should colleagues, today give him our tribute, by jury; provision for adequate fire our personal tribute, of admiration, drills by theater employees, also in public and parochial schools, and in shops and factories; constitutional convention; civil service extending the public trustee by orders to be there is about them an air of stoic nicipal court, in the county and to deputy factory inspectors; amendments permitting the State to control management of the county jails and that farm colonies be provided for misdemeanants to the reformation of the MOSQUE AT MEDINA offenders and the economy of the State; reorganization of school board,

ADVERTISING OF LIQUOR

BRITISH PUBLIC TRUSTEE SPEAKS ON GERMAN BANKS

Special to The Christian Science Monitor LONDON, England - The Public Trustee, Mr. C. J. Stewart, in a recent address to the City of London Trades Public Trustee during the war. Returns, he said, showed that about £32,000,000 of enemy capital was in companies. There was about £71,-000,000 of property in Great Britain held and managed on behalf of the enemy, and about £19,000,000 of bank balances and debts over £50 was due to the enemy, making a total of £122,-000,000. They had received 30,000 claims against enemy property, and they were coming in at the rate of

about 150 a day. Referring to the German banks, Mr. Stewart said that shortly after the commencement of the war, licenses were granted by the Home Office to Bank, the Dresdner Bank, Disconto-Gesellschaft, the Oosterreichische Laenderbank, and the Anglo-Austrian Bank, for the sole purpose of collecting assets with a view to payment of nonenemy liabilities arising out of pre-war transactions, which, in the ordinary course, would be discharged by the London establishments. Sir William Plender was appointed controller, and he, in turn, appointed a supervisor to act for him at each of the banks.

With the assistance of the Bank of England, who advanced under the treasury scheme of September, 1914. the necessary funds to meet the outstanding acceptances of the five banks, the. liabilities payable under the licenses had been discharged or prothe Laenderbank, where the cash redistribution of 30 per cent to its unand when funds permitted. By terms Bank of England to the order of the treasury, and in the case of the odged. 'It was unlikely, however, that the assets of the remaining banks would yield during the war a sum sufficient to discharge the outstanding indebtedness to the Bank of England or payment in full to the unsecured day. creditors of the Laenderbank, and it was, therefore, unlikely that in their cases any surplus would be accumu-

lated. Each of the banks held large blocks of securities on behalf of enemy customers or its own head office or for-eign branches—the value of such securities held by the three German industrious where he can see anybanks being roughly £20,000,000. Bill Designed to Prevent a Con-

Special to The Christian Science Monitor from its Washington Bureau

WASHINGTON, D. C .- The Senate took up consideration this afternoon of the bill designed to prevent con-tinuance of the practice of liquor in-terests sending advertisements of intoxicants through the United States mails into states having prohibition

Senator Bankhead, in charge of the the several states enforce their pro-hibition laws. It was pointed out by Senator Gallinger that the bill would simply place publications outside a Chairman Sparkman will report the

out, however, that as more and more states are coming within the prohibition category, it would be difficult for Congress to continually keep the law

The bill was amended to direct the Postmaster-General to publish from time to time a list of those states in ch the law would apply. Senator indexter thought the bill should be allowed to exclude liquor advertiseents of every description, holding that, as presented to the Senate, the measure did not appear to be sufficiently inclusive.

The bill provides a fine of \$1000 or The bill provides a fine of \$1000 or imprisonment for two years for first violations of the law. For a subse-Hartford, \$70,100. quent offense a five year sentence would be a maximum. Any postal official or employee violating the law would be liable to a fine of \$100 or imprisonment for one year.

Dry Sentiment Grows

Gain in National House Shown by District Bill Vote

pecial to The Christian Science Monitor from its Washington Bureau

WASHINGTON, D. C.-Passage by the House of the District of Columbia Prohibition Bill is generally conceded by both its friends and its opponents. Not only has "ary" sentiment in the House increased notably recently, but there have been additions to the number of "dry" states and congressional districts, and repalbition amendment by a safe margin, invasion.

Representative Randali of Califorwho is the first member ever ler the prohibitionist designade to have the referendum attached to the bill in the House, despite the failure of that proposition in the Sen-ate, and in spite of the fact that the district has not been given the ref-erendum on all the mass of legislative measures under which it has been administered. The referendum ition has no chance whatever before the House, Mr. Randall be-lieves, and he does not believe that the district committee will accept the

proposal.

It may confidently be stated, Mr.

Randall also said, that there will be a vote on the bill excluding liquor advertising from the United States mails. "And a vote on it means its passage," he said. He declined to specify just now the basis for his assurance that the bill would come to a vote, but asserted his certainty of it.

Diplomatic Bill Passed

Senate Drops Clause Reproving Secre-tary of Paris Embassy

WASHINGTON, D. C.—After reducing the Diplomatic and Consular Service appropriation bill an agregate of 52,500, the Senate passed the bill yesterday. It now goes back to the House for concurrence. The chief contest in the Senate came on a clause in the House bill almed at reproving Secretary Bilss of the United States.

ident Wilson in a newspaper article published in the French capital last MEASURES FILED IN LEGISLATURE LESS IN NUMBER

in Massachusetts House and of the Past Two Years

below that of the last few years unless an extraordinary and unexpected deluge of bills and petitions are filed during the remainder of the week, offi-cials of the Legislature stated today. Their opinion was based on a comparison of the measures filed up to the hour of closing last night with the number filed up to a corresponding period in previous years. The House clerk's record, which is accepted as an index, showed 330 measures filed Wed-

filing, but this deluge is an annual occurrence and examination of the much from year to year relatively to County courts; from Alonzo M. But-the number of bills filed prior to the terfield, that parties moving furniture closing Saturday. The flood of filed bills next Saturday is not expected to be greater relatively than in other years and, if this proves to be so, the

How the filing of business in the shall not expire on the Jan. 1 after House has developed during the final the date of the license, leaving the week for receiving measures during the past few years and how each day's Rafferty, for the licensing by the Comrecord for the first half of this week is missioner of Weights and Measures of behind that of recent years is shown slot machines and other like autoin the following table:

1914 1915 1916 Monday 473 297 277
Tuesday 510 369 337
Wednesday 603 430 419
Thursday 766 587 545
Friday 1,057 828 784
Saturday 1,716 1,361 1,294

The year 1914 was the banner year for volume of business in the Massachusetts Legislature. The business men and the press began to criticize the mass of material that was annually submitted, since but a relatively small number of good laws resulted. The leaders of the Legislature began to discourage the filing of "flippant" bills and duplicates of any already submitted. Consequently, the number filed fell off in 1915 and again in 1916. This year the imminence of the constitutional convention is expected to cause a tendency on the part of petitioners to withhold measures which would be referred to the convention terests welcome the decision of the any way. This may account for the smaller total already filed.

Petitions filed with the clerk of the Massachusetts House today included

EVENING SCHOOL PROBLEMS ARE TO BE DISCUSSED

Second of Series of Conferences on Subject to Be Held Satur-School in Lowell

Problems of citizenship training board: Lieut. A. A. Merrick, Detriot, and other related matters will be discussed at the second of the series of conferences on evening schools in next Saturday at the State Normal School in Lowell. Dr. Payson Smith, Commissioner of Education, will preside and make the opening remarks.

Teachers in evening schools under public or other auspices, members of Asst. Surg. E. J. Stein, to naval others interested in the subject of sion because of baths already mainschool, Washington; Asst. Surg. A. evening schools and immigrant edu-Robinson, to naval school; Asst. Surg. cation are invited to attend the con-Board of Education concerning opportunities for immigrants not required by law to attend any school. The returns are made the basis for discussion.

These returns show that 35 out of the 36 cities of the State maintain evening schools. The other one reports no need for evening schools. No schools. One town, North Andover, near-by city. Of the 249 towns of less Washington; Gunner A. M. Hinman to than 5000 population, eight maintain Delaware. tending evening schools in nearby towns, four report evening schools started this year for the first time 218 have no evening schools and 17 towns have not reported.

One city offers day school opportuni ties for immigrants not obliged by law to attend day schools. Seven cities mention "special," "ungraded," "steamer" classes for illiterate minors be twee 14 and 16 years of age. Among cooperating organizations mentioned are churches, societies, social organi-

of the Immigrant." Other speakers will be Laurence J. O'Leary, super-visor of evening schools, Lawrence; Ralph C. Fitts and Edwin L. Haynes, superintendent of schools, Methuen. The third conference will be held at the State Normal School, Fitchburg. on Jan. 20. The others are set for Springfield on Feb. 10 and Boston on

day at the State Normal REPORTS ON FOUR **NEW PROPOSITIONS**

The Metropolitan Park Commission reported to the Legislature today that investigation shows it would not be advisable to undertake to establish Massachusetts arranged by the State camping grounds in the Metropolitan Board of Education. It is to be held districts. It would be necessary to furnish proper water supply, sewerage, care of refuse and policing, and

the expense would be great.

Showerbath facilities at the Speedway Playground in Brighton was reschool committees, employers and all ported as unnecessary by the commistained at the North Brighton Play-

ferences. They are the result of an of the purchase of a triangular plot of land in Everett lying between Main street, Broadway and the Revere Beach boulevard, for park purposes. and proposed that 25 per cent of the cost be borne by the Metropolitan Parkway Funds, and the balance by

the city of Everett. Recommendation of the purchase of land for a parkway from Middlesex Fells in Stoneham to Quannapowitt. Parkway in Wakefield was also made by the commission. The cost of the land is estimated at \$50,000. Construc-tion of the boulevard, which the commission believes should come later, is estimated to cost, for the full distance, \$250,000.

COLLECTOR BILLINGS TO ACT

Once again Edmund Billings, collector of the port of Boston, has been called upon to act as mediator be-tween the Electrical Workers' Union and their employers on the subject of wages and hours. Five years ago Mr. Billings performed a similar duty and drew up a working agreement which has held until today.

TEXAS PROHIBITION MOVE are churches, societies, social organizations of business men, other social organizations, particularly clubs for immigrants, and in a few cases social service organizations.

OFFICIAL NEWS OF THE WAR FROM CAPITALS

The struggle which has been in rogress for some days past on the astern front in the region of Riga appears to be growing in intensity, but reports from Berlin and Petro-grad as to how it is developing are in serious conflict. Petrograd claims that the Russians captured German positions near Lake Babit, between the irul marshes and the As River and advanced their lines over a mile to the south. Berlin, however, asserts that Russian attacks in this region

Meanwhile, the forces of Field Marshal von Mackensen in Moldavia continue their advance northwards. The lustro-German and Bulgarian forces have now, according to Berlin, crossed the River Putna, north of Fokshani, and forced the Russians at one point

Further activity is reported from the Tigris, where Indian troops have atacked the Turkish lines at the bend of the Tigris River, northeast of Kutel-Amara. London reports a successful raid on German trenches on the stern front, in the neighborhood of Beaumont-Hamel.

OF THE ENTENTE PEACE ATTITUDE

(Continued from page one)

reached the date of victory may well The road to victory, long though it may be, The Times editorial concludes, is now running straight to

It is particularly satisfactory to the western Entente peoples that a thorough understanding, as indicated in yesterday's cables, appears to have been reached between Italy on the one hand and the rest of the Allies on the other in the matter of Greece, a somewhat unfortunate impression having been produced by Italy abstaining from identifying herself with posts on the southern slopes of Cimo a clause of the Dec. 31st note to Greece demanding release and reparation for Venizelists.

This understanding, however, is indicated mainly by the unity of the Greece, for the secrets of the conference have been very closely guarded and pressmen have deduced the satisfactory nature of the conference mainly from the smiling and happy expressions of its members both in Rome and on their return to their

That the conference was of a very from the almost complete absence of ceremony usually accompanying such conferences. On Saturday the Entente representatives sat for six hours, the Prime Ministers having a short consultation by themselves during the members holding separate sittings in the evening, the former to consider diplomatic problems and the latter military questions. Mr. Lloyd George's speech today is, therefore, fooked forward to with especial eagerexplains the Ambassador's references may shed light on what was accom-

Great Guildhall Meeting

Mr. Lloyd George's Speech May Refer to Near East Questions

Special Cable to The Christian Science Monitor from its European Bureau LONDON, England (Wednesday)-The announcement that Mr. Lloyd

George will speak at the great Guildhall meeting tomorrow, which will of victory," has aroused the keenest office. interest. The Prime Minister has not spoken in public since his House of Since then he has visited Rome and ation in history. while the secret of the council held in the Italian capital has been well kept, those who were present are freely declared to be quite unusually satisfied with the result.

It has been stated that as a result of explanations and discussion, unity view has been achieved by Italy and her allies and this has, of course,

In abstaining from associating herself with her allies in the fourth clause of the Entente note on Dec. 31, which demanded release of and recompense for Venizelists arrested after future Germany may achieve her polit- the events of Dec. 1 in Athens on the ical aims as regards the United States are ground that this was an internal mat-Camel Corps left El Arish at 4 p. m. without being hampered by Washing-ter, Italy could take the position that makes its report to the Legislature. unlike her allies, England, France and

If the inspired statement in the Paris press that Italy identified herself with the Allies' point of view retain explanations, means as it seems to do that in the joint note handed to the Athens Government yesterday morning demanding immediate acceptance of the demands in a previous note, Italy identified herself with all the Entente demands without reservation a further step has clearly been taken in the consolidation of this alli-

Additional probability is lent to this view by the reported presence at the Rome conference of General Milne. British commander at Salonika, Sir F. Elliot, British Minister in Athens, and Earl Granville, newly appointed British agent to the Venizelos Government. Many other vital matters were, of course, undoubtedly discussed, hence, it is expected Mr. Lloyd George's speech tomorrow may contain a very important pronouncement.

Italy and Greece

Former Now in Line With Allies on Near East Problem

Monitor from its European Bureau would not leave the party but would newspapers have of late been particularly emphatic in the anti-Venizelist

everywhere the result of the popular ovement which has made him leader of three-quarters of Greece, including

the islands. While publishing these statements from correspondents, the Corriere della Sera also endeavored to minimize Mr. Lloyd George's recognition of the Venizelos representatives.

Other newspapers have urged the extension of the blockade to the Venizelos territory and have appeared to associate themselves with the attitude of the Athens Government. It is not clear that the newspapers have given expression to any large body of Italian opinion, but only to that of the ultraimperialists who feel that Greece, under the leadership of M. Venizelos with his nationalist aspirations extending to Asia Minor, could not possibly fail to clash with Italian ambitions in the eastern Mediterranean.

The Christian Science Monitor informant considered that a very important result had been achieved in bringing Italy into line with the Allies. and Italy had shown a "very excellent Allies in the latest ultimatum to spirit," full of promise for the immediate future in setting unity above every other consideration.

intimation that the President would issue a peace note that afternoon, before it was given to the Washington newspaper men for publication the next morning.

Evidence showed that, although the Washington representatives sent messages to the Wall Street Journal that the forthcoming note was officially stated not to be a peace note, "a broker's private wire" from Washington carried different information which was brought to the Wall Street Journal by its reporters in New York and was used as a basis for the ticker statement, although the fact that official Washington said it was not a peace note had been received.

James Reilly, managing editor of the Wall Street Journal, was heard by the Rules Committee at a session of a public hearing held for that purpose this morning. He explained the ticker service of Dow, Jones & Co., publishers of the Wall Street Journal. His business, he said, is to print "every bit of gossip which reaches us," that may affect the stock

"If we are given something in confidence we would maintain our honor first and would retain no man in our employ who would not do so," he said. us that the President was preparing some sort of a peace note," he said, in explaining the origin of a statement carried on the ticker about 2:10 p. m. the day before the publication of the President's peace note, to the effect that "brokers' private wires" were carrying intimations that the President would, in the near future, address to the belligerents some proposals for

Mr. Reilly said that the origin of this was in Wall Street "rumors," and that nothing received from their Washington representatives furnished any basis for it. Telegrams were introduced in support of this, the company's Washington office having wired that Secretary Lansing had announced that a note dealing with "the economic conditions" in the United States resulting from the war was to be handed to the newspaper men at 5

o'clock. The general effect of this ticker statement, Mr. Reilly believed to have been wholesome. It was coming to be generally rumored that "something of a very disturbing nature" was imchanically a weak market and the result of such a market was to enable brokers to strengthen their margins and generally adjust accounts." referred to rumors "of the street." brought to his office, of a meeting of brokers "about Dec. 15 at the Metro- BANISTERS politan Club, at which they were recome to the conclusion that an amount of industrials were being offered for situation, and, as a result of their meeting, unprecedentedly heavy margins were demanded and in some cases full payment required.

The witness stated that, so far as he knew, there was no advance information as to Mr. Lansing's first com ment on the President's note and that the price of Steel was evidence of

The witness was then excused and no others were present, or are expected to be heard. The committee then went into executive session to decide what action to take on the whole subject. Chairman Henry of the Rules Com-

mittee today received a letter from Samuel Untermeyer of New York denying that he had any conversation with Mr. Lawson or given any advice of a professional nature. RETIRING AMERICAN MINISTER

MOTOR VEHICLE COMMISSION FOR all operators of motor vehicles before granting them licenses. "A bill providing that henceforth no license to operate a motor vehicle shall be granted to any person under its years of the shall be granted to any person under its years.

ciation Advocate Change

supervision and highway construction in Massachusetts by removing the powers of regulating motor vehicles mission and conferring them upon a newly created commission, is advotated in a lolar statement in the state right was a state of the st ated in a joint statement by Moor- Eliot Wadsworth. field Storey, president of the Highway Safety League, and Francis Peabody, create a separate commission.

The joint statement begins by referring to Governor McCall's com- WAR SAVINGS ents on the highway situation and his proposals for improving the situation, and continues:

"The first is by rearranging the departments of the Highway Commison either by adding a fourth com- Special to The Christian Science Monitor missioner to supervise motor vehicle operation and registration or by perfrom the Highway Commission.

efforts both on the part of public of-ficials and private organizations to An issue of war make the highways safer, conditions car sees an increase in the number inpunished. There is neither coordination nor harmony between the vahe subject. The motor vehicle problem requires treatment of the most expert kind. Such treatment is now lacking because the Highway Commis-, the body most nearly concerned with the problem, is so overloaded with other work that it cannot devote proper attention to protecting the lives

and safety of the public. The two proposals referred to, while somewhat similar on their face, differ radically in fact. One assumes that highway construction and autole regulation naturally go hand in hand and that the present method combining the two under one head MR. DANIELS IS has proved satisfactory. The other al proceeds on the theory that poard of engineers is not the proper dy to frame and enforce what are sentially police regulations and that sent conditions prove it. These nditions are just what one would expect from motor vehicle supervisa road building commission. The bulk of the attention, time and inon road building and an enormous of the approximately \$3,000,000 spent the Highway Commission is derived from motor vehicle regisstruction and only 12 per cent upon vehicle regulation). Consejuncture requires.

The first proposal of the Governor which is understood to be suggested BUSINESS MEN TOLD by the Highway Commission, leaves the control as before with that board, merely reli ing it of certain troublene detail. Such a plan is absurd. deal with it; the less knowledge they merce. Mr. Hurley said: will have concerning it and conse-

It is vital to meet the problem produce their goods." with both courage and intelligence. The first proposal is neither courageous nor intelligent, but a feeble makeshift suggested by the Highway Comon for the purpose of preserving its own authority and prestige. A separate commission must be established. The commissioner must be a alary, with a chance to exercise his igence and enterprise on the n before him and upon whom shall fall the responsibility of meeting this problem successfully. Such a man will not serve in a merely sub-ordinate position. Whether the High-

It is true that the modern bookseller is helped over this predicament by the existence of the wholesale bookseller, but the man who finds that he has to turn and "The State and the Control of away many customers because he does not happen to have the particular book they ask for will find himself without

Although the universities may be said to have called bookselling into being in the Middle Ages, and the Reformation led to a largely increased demand for books and pamphlets, the modern system of bookselling arose out of the establishment of the printing press, and the golden age of the bookselling business in England was the Eighteenth Century, when bookselling and publishing were combined. Durert de Traz, has now been translated Fisher, vice-chancellor of the Univer- diverged very widely, in the course of ing the early years of the Sixteenth ert de Traz, has now been translated into the German, under the title, "Im ministration." which deals chiefly with the possibilities in the use and deand booksellers had a peculiarly bad time, first under the censorship of the Star Chamber, which was relaxed under Queen Elizabeth, not from any superior openness of mind but simply because she did not care a farthing rush what the nature of a book was. provided it did not uphold the views of her religious opponents, and again under the champion among censors, Archbishop Laud.

Of the many eminent booksellers of the Eighteenth Century Andrew Millar was the most remarkable. A Scot who possessed more knowledge of mankind than pretensions to learning, he was for some years associated with another Scot, William Strahan, and in conjunction they produced Johnson's Dictionary. Boswell's estimate of him as possessing "good sense enough to have for his friends very able men to "State Services," published by Smith. ALL BOOKS of All the Publishers on Sale give him their opinion and advice in Elder, he advocates the managemen the purchase of copyright" was shrewd of the farming in each district by the and accurate. In consequence of this county council. MINNESOTA HAS FINE OUTLOOK

Coach L. J. Cooke Expects to Turn Out One of the Best Fives Ever to Represent the Gophers

Special to The Christian Science Monitor from its Western Bureau

Western Conference championship ast year, the University of Minnesota thall team is likely to show a brand of the chief collegiate gymnaium game that will surprise its rivals in the "Big Nine." The five has much good material left from last year, me promising new men, and is ened greatly by the return to play of F. H. Stadsvold '17, captain hree years ago, and one of the most likely forwards who ever wore a uniform. Stadsvold has been ut of the last two preliminary games, but he has been practicing con-stantly during the past week, and is likely to be in the line-up in the first

Dr. L. J. Cooke, who has been coach of basketball and athletic director at Minnesota for many years, after tell-ing a writer for The Christian Science itor that his material is above the average, and lamenting the fact that the gymnasium facilities at Minnenot are not ideal, said that prospects here are better than in late years. While he talked the cadet corps was drilling on the gymnasium floor in the Armory and did not vacate it until

We will have a strong team," said Coach Cooke, "but we are not by any neans making claims on the cham- for the 1916 champions. The sumonship. So far as one can tell beore the season has really started, Illinois seems to have the lead on form. lisconsin lost many of her star men by graduation and is not likely to be ng the leaders, though she has a coach who has the reputation of doing

wonders even with green material."
The Gopher five has gone through
ts preliminary games without a defeat, though it has played several g minor college teams, including | Carnochan the University of North Dakota, champoins of the Northwest, among the secondary colleges last year. Other Adolphus, St. Olaf College, Stout Institute, Macalester, St. Thomas, River Falls Normal and the Winona Y. M.

Eleven men are being tried out in actice for the five, and most of them have been used in the early games. At center N. W. Kingsley '19, H. C. Timoff. He is accurate at the baskets, At forward Stadsvold and C. W. Gillen '17 probably will be chosen, though while Stadsvold has been out in Newark. of the game Capt. A. H. Douglass has shifted from guard to forward and has played a consistent game. Gillen, a tall man, is a finished player in almost every department, expert in oling and evading his guard with throwing, however, he is excelled, as is every other member of the squad, by Stadsvold. Fred Oswald '18, also Manager J. H. Guntzer Wednesday. is expected that many of the members

by Captain Douglass, A. D. Wyman '18, which relations were broken in 1916 ferred for the place, though when the captain is shifted to forward Part the Violet schedule is Stevens. ridge has made good as his substitute. Nyman, an excellent thrower of long ses, also is a rough-and-ready man in defending his own basket, quick teams will be played at University on his feet and clings closely to the Heights. The schedule is as follows: osing forward. Douglass, a good rd, also is accurate at scoring, but he has been pushed for honors in the preliminary gamea in this department by the football man.

vard last season; J. E. Connell '17, a forward who is in school but not out for basketball; E. S. Platou '18, center, ineligible; C. W. Drew '18, cener and forward, who is now at the Massachusetts Institute of Technology, and F. L. Redfield, substitute

The tactics so far displayed at the Armory indicate that the short passing game will be depended on for scoring, with an occasional long pass from Wyman or Douglass. The five to be picked will probably be above the average in weight. The schedule

BOSTON A. A. IS STILL LEADING HOCKEY LEAGUE

Boston Hockey Club in Amateur Hockey Preliminaries

AMATEUR HOCKEY LEAGUE (Boston Division) Won Lost Boston A. A..... Boston H. C..... Arena H. C..... 0

Boston Athletic Association contin-MINNEAPOLIS, Minn .- Opening the ues at the head of the standing in the eason on Jan. 13 with the University Boston division of the Amateur Hockey of Wisconsin five, which won the League championship series, following its victory over the Boston Hockey Club in the Boston Arena Wednesday evening by 4 goals to 3. This gives the 1916 champions two straight victories.

> to win the game last evening and while four years. the wearers of the Unicorn came through to a victory, they were forced to play an overtime match. The winners were greatly handicapped by the absence of Donahue at goal. Donahue is easily the best goal in the league and while Sands did well as a substitute, it is doubtful if Hockey Club would have scored had Donahue been in his usual place.

Each team scored a goal during the score for Hockey Club and Osgood scoring for the B. A. A., when the of that season's races made to congoals at the opening of the second half, Osgood and Tuck making the points. This gave the B. A. A. a commanding lead of 3 to 1, but Smart shot two goals for the Hockey Club, bringing the half to an end with the two teams tied. It took 13m. 29s. of an overtime period for Captain Huntington to score the winning goal

other buildings. The purchasers con- bloomed out into full flower just betemplate improving the buildings, cause of the Townsend and Dunham erecting a new house and other farm enterprises. But it doubtless will do buildings, and occupying as an all-the so at some unexpected moment, when way and freshen up their idealism for them. It only begins to fulfill its Sabean of the Drury. mission when it makes singers have a pleasant time together, or when at the most it gives their immediate friends a pleasant evening.

A work on the program that was worthy of all the expert knowledge of music the singers could bring to it was "The Consolation of Music," by Leo R. Lewis. The piece is composed on a plan of larger rhythm of soft and loud sound that only thoughtful interpretation can make effective. And it that can have its force only when the parts are accurately read. In these particulars the composition was well presented by the Choral Music Society. But in other points, which were after all not so difficult, such as rhythmic accent and melodic phrasing, the per-

formance was a little heavy. Grainger's "Merry Wedding" felt the lack of rhythm and phrasing even more than Professor Lewis's piece. needs a greater contrast of tone be-

The two best interpretations, all gave, were of Osgood's "Christmas Another small transaction in Rox- Bells" and of Ladmirault's carol

Prof. J. W. Sanborn of Gilmanton. N. H., declared that the farmer should get the same price for his milk throughout the year. He claimed the counties. He says: "All over Westtheory that the farmer can produce ern Nebraska we have men who leased milk cheaper in summer than in winter is a false one. "The grazing does not last all summer and the loss in the last three months in the year more than makes up for what little is gained in the summer."

Ambrose Fuller, Commissioner of Agriculture in New Hampshire, said he organization stood for more than 5-cent milk: it stood for the retaining of breeding cows that had fallen by the wayside in New England. He also spoke in behalf of the milkmen getting real money for real values, asking, "Who else sells a 20-cent prod-

uct for 5 cents?" While admitting their ability through combination to increase the price of milk, some of the farmers said yesterday that any abnormal increase would be impossible because such an advance would immediately bring in

vestern competition. They claimed that the farmers west of Buffalo were already looking toward the New England field, as a selling region for their product, and that with modern methods of transportation and handling, milk could be sent to Boston from points as far west as 10,766 acres; saline land, \$2825 acres; Wisconsin. That milk producers of the Middle West would seize upon any high prices in the East to flood the MRS. CATT AGAINST PICKETING eastern market with western milk, was the only competition which the New England farmers feared, in

marking up the price of his goods. It is expected by the leaders of the ciation, says she thinks the Congress New England Milk Producers Association, that the organization will be in The North End Improvement Association held its annual meeting last active part in establishing new milk responsible for the delay of Congress up to \$32,965.25 the various teams engaged in the work were active today

BUSINESS, FINANCE AND INVESTMENTS

STOCK MARKET IS DECIDEDLY IRREGULAR

Sharp Decline in Leading Stocks Followed in Afternoon by Brisk Rise — Fluctuation Wide and Erratic

Early New York stock market prices fluctuated irregularly and rather un certainly today. The range of prices was fairly wide, the tone being heavy at times and then firmer. United States Steel gradually worked up nearly a point.
Studebaker sagged, and General

Motors (new) was again decidedly weak. International Mercantile Marine common sold off a point or so, but the preferred advanced. An-acondo and Utah showed some strength, particularly the latter. Mexican Petroleum gained some ground New Haven Railroad was heavy once

There were mixed changes in the Boston stock market in the fore part of the session today. Gulf common rose slightly more than a point, but Old Dominion and Lake Copper were substantially lower than they closed

The New York market continued erratic and unsettled late in the first

Whether or not it was in anticipa-tion of the Allies' answer to President Wilson's peace note, stocks took a downward course soon after the first half hour's trading and by mid-day—the tone had become distinctly weak. Losses of 2 to 4 points were frequent on the New York exchange. crucible Steel opened up ½ at 62½ and declined nearly 3 points during the first half of the session. General Motors (bow) opened unchanged at 106½ and dropped to 101, rallying moderately later. United States Steel opened up ½ at 110½, improved to 110% and dropped to 109% before midday. Republic Steel opened up ¼ at 78, improved ¼ and dropped 3 at 78, improved 1/2 and dropped 3 points. Texas Company opened un-changed at 237, advanced to 238 and

dropped 4 points.
Gulf common opened up ¼ at 109½ dvanced to 110% and declined to 108. Allouez opened unchanged at 65 and declined to 62, recovering 2 points before midday. United Fruit sold off 2 points to 147. Shortly after midday a buying move-

ment started. There was a hurried covering of shorts and before the be-ginning of the last hour the net results showed big gains for many issues. General Motors rose 7 points from he forenoon low. Central Leather, C& Ninth av... 49 49 49 We thouse rts 1/2 5/8 1/2

NEW YORK BONDS NEW YORK—Following are the STEADINESS IS LACKING LONDON BOARD

Scattered Selling Again Rule. With Business at Low Ebb-American Shares Weak-War Loan Higher

(By Boston Financial News)

LONDON, England-Generally securities on the stock exchange lacked steadiness today.

Scattered selling in anticipation of the new war loan was repeated. Business was on a small scale.

One of the exceptions was the 41/2 per cent war loan which was cheerful and higher.

Premier Lloyd George's speech as well as that of Chancellor of the Exchequer Law at the Guildhall in the afternoon was awaited with interest.

They were expected to give full details with regard to the issue. Other gilt-edged descriptions were

In sympathy with the market at New York Americans were weak. Despite good earnings Canadian Pa-cifics were lower. South American

rails were offered. Despatches from Athens announcing the yielding of the Greek Government

to the ultimatum of the Allies helped foreigners but they were not active. Fresh buoyancy was noted in Hudson Bay Company issues. Mines and oils were irregular.

GRAIN MARKET C. F. & G. W. Eddy, Inc., of the Boston Chamber of Commerce, received the following from their Chi-

cago correspondent: Wheat - Wheat was irregularly lower. There was considerable liquidation for some of the large commission houses, part of which was for Wall Street. The sinking of the Cornwallis led to fresh apprehension of

increased submarine operations. Wheat and flour clearances from the seaboard today were heavy, however, at more than 2,000,000 bushels.

General sentiment is more mixed.

The tendency is to wait the reply of the Entente Allies to President Wilson's note. This report is expected to be published tomorrow. Attention was attracted to the weather map which did not show any covering in the Southwest, although

yesterday it was reported that Kan-

sas, was receiving beneficial covering. Foreign demand was quiet early, but cash wheat at the Gulf showed no loss of premium. The B. & O. road has levied another embargo affecting grain shipments. Corn-Was firm early. The bullish Argentine reports helped the list. There were predictions of firmer cash markets because of lighter country

offerings. Advances were not held however, as declines in wheat caused speculative liquidation and the fact that the Rosario market was not higher was discouraging to bulls. Oats-Were affected by changes in Boston & Maine road's flying squadron other markets. Country offerings were reduced. The commission house trade was on the selling side, partly

due to apprehension of interruption to

shipping.

The growing foreign demand for the low-priced American automobile is an important factor in study of the socalled "saturation point" in automobile consumption. Prior to the war American manufacturers were successfully competing in European countries in a small way with home manufacturers, and at that time with the demand in this country they had little time for pushing export trade. Even at present, export business is small pared with total business done. In the 1916 fiscal year only 56,231 passenger cars were exported out of a total production of 1,500,000.

nufacturers in the United States ook for a steady increase in demand for their product from South Amer-ican, South African and Far Eastern centers, and also expect a heavy business with countries now at war just as soon as peace is restored and embargoes are lifted.

PENNSYLVANIA ROAD'S MEETING

PHILADELPHIA, Pa.-At the annual meeting of Pennsylvania Rail-road to be held March 13, stockhold-

from time to time such amounts, either of general mortgage bonds, or of capital stock that has heretofore been authorized by stockholders, as may be necessary to provide for company's capital requirements in near future, including maturing obligations.

large flow is attributed to the fact that the well is 200 feet deeper than that of any other well in the immediate vicinity, the lower strata being struck at a depth of 2300 feet.

COPPER METAL SITUATION DECIDEDLY FIRM

Withdrawal of Offers to Sell Nearby Metal Deliveries Significant-Great Britain Order

NEW YORK, N. Y.-Withdrawal of offers to sell nearby copper metal is considered very significant in the Baltime trade in view of recurrent reports that Great Britain is negotiating with NEW YORK, N. Y.-From outbreak American producers for an amount of of the war until end of last October copper greater than any heretofore United States exported \$112,285,745 of purchased. It is believed in the trade that England, for account of herself senger cars and \$37,745,739 of auto- and allies and Canadian munition e parts (not including engines manufacturers, is anxious to book copand tires), a total of motor exports per for delivery through the last six of \$226,703,617. This showing is by months of this year, and that conan industry of actually less than 20 ferences have already been held in this city between bankers represent-In the year ending June 30, 1916, ing Great Britain and representatives exports of automobile parts, exclusive of big copper producers. Some reof tires and engines, amounted to \$22,- ports place the price under discus-

as recently as in 1912. In the last are inclined to reticence on the subfiscal year exports of tires were \$17,- ject. They say, however, that the \$36,227 and of gasoline automobile Allies, represented by Great Britain, ines \$2,636,862, compared with \$4,- will have to come into this market in 963,270 and \$1,402,334 respectively the the near future and cover their copper requirements for the rest of 1917

For the first time in many weeks years is shown in the following table, London dealers are cabling sellers in the grand total column including parts the United States, offering as high as except tires and engines) as well as 281/2 cents a pound, freight alongside ship, for any January-February-March metal. These offers have been de-

SIXTY DOLLARS FOR BETHLEHEM

berger Bros.; Essex.
Roanoke, Va.-W. Lee Brand of Brand Influential People Said to Favor This Amount as Regular Divi-

> NEW YORK, N. Y .- What dividend action Charles M. Schwab will recommend to Bethlehem Steel directors at their meeting on Jan. 16 he alone knows. Some time ago Mr. Schwab intimated his intention of calling together the larger shareholders to ascertain their views on the question, but this conference has not taken place, and apparently will not eventu-

Several influential stockholders are known to favor an increase in the handling their freight traffic with only rate to \$60 a share, as they claim that Bethlehem can easily continue to pay this, and that they are entitled to share in the enormous profits of recent years and further large profits in prospect. It is generally b that either this course will be followed or an extra dividend of \$30 a share. with the regular \$3 established last

year, will be declared. Bethlehem Steel will not report as large profits for 1916 as had originally been hoped. In the first place the war Wilkesbarre-W. Austin of Austin Shoe tax of 121/2 per cent on all munitions earnings will reduce the net more than \$6,000,000, and appropriations for depreciation will be unusually large, or around \$11,000,000.

Even after these charges, close to \$50,000,000 will be shown earned net for stock, or, after preferred dividends, between \$325 and \$330 a share on the common.

Earnings for 1917 are estimated at around \$40,000,000 after deducting bond interest. Even with liberal allowances for taxes and depreciation this should leave more than \$200 a share on the common stock.

Or, Bethlehem's earnings for the Co.; U. S.
Mt. Holly, N. J.—Ben Frazer of Mt. Holly
Shoe Co.; U. S.
Trenton, N. J.—W. S. Rendell of Rendell
Shoe Co.; 135 Lincoln St.

Or, Bethienems earnings for the three years 1915-17 are expected to be equal to nearly \$650 a share on its junior stock, and for five years approximating \$710 a share. three years 1915-17 are expected to be equal to nearly \$650 a share on its

By its extensions last year Bethlehem, it is felt, has assured itself of \$100 a share yearly on its common in normal times. The corporation's subsidiaries will have a steel capacity of about 3,500,000 tons. Allowing for actual output of 2,500,000 tons an average profit of only about \$9 a ton Ferro-manganese, would be necessary to pay all charges An issue of French treasury bills in would be necessary to pay all charges London, amounting to £8,000,000, to and dollar for dollar on Bethlehem replace a similar sum, was quickly common and Bethlehem's activities are not confined to steel-making. Its Three hundred thousand bushels of shipbuilding operations should add

Bethlehem is now spending about \$2,500,000 on new construction at all its plants. Its 1916 expenditures on United States. tion in 1916 is estimated at \$23,000,- this account were more than \$1,500,-1906, \$1,188,990 in 1896, and \$498,286 tion in the spring of this year, ap-

ing power. than 500,000,000 tons. The Tofo mines in Chile contain 100,000,000 tons or Lehigh Coal & Navigation Company, more of the highest grade ore, and it also has deposits at Port Henry, N. Y. purchase of the Lackawanna's Shenango properties gives it practically nango properties gives it practically complete control of the ore bodies in that district. Most of the ore going into its furnaces comes from the Lake Champlain region of New York and Petroleum, *barrels..292,300,000 281,104,104 into its furnaces comes from the Lake from Cuba, but it is rushing work on several ore boats for transporting the Chilean ores. ACCOUNTING FOR EQUIPMENT AND THE DECLINE IN

SHAREHOLDERS Price in Boston Drops to Less Than Two Points of Lowest Level - December Surplus

All sorts of reasons have been se dend Rate—Heavy War Tax Haven railroad shares, which sold down this week to well below 45, or within less than 2 points of its low record.

So far as current operating results enter into the situation, it can be said that preliminary returns for December indicate \$700,000 surplus earnings for that month after charges. of four types. There is reason to be This contrasts with a \$25,000 deficit in lieve, however, that the order may December, 1915. Moreover, the other be doubled, and it is understood that winter months should compare favorably with those of a year ago.

Though gross revenues show as much business being done as last year at this time, the New Haven lines are about 42,000 cars on the rails, compared with some 55,000 a year ago. what is naturally a terminal territory and the recent increase in the car-hire charge to 75 cents a day is therefore particularly trying to them, high demurrage charges being received by the New Haven, together with its new locomotives, will help offset equipment-hire costs and should make possible quicker handling of "foreign"

It is understood that New Haven's bankers have given assurance that there will be no difficulty as regards renewal of the approximately \$42,000,-000 floating debt due May 1 next. This consists of \$25,000,000 41/2 per cent year notes of the railroad itself and about \$17,000,000 three-year 6 per cent collateral debentures of New England Navigation Company. Of each of these debts, the management has paid off about \$3,000,000 from the original total.

UNITED STATES MINING OUTPUT

Engineering and Mining Journal presents the following tables showing production of minerals, chemical substances and metals in the United States during 1916:

NEW HAVEN STOCK STEEL DEMANDS OF EUROPEANS

French Government May Spend \$40,000,000 in United States for Cars-Italy in Market for Bars and Forgings

The French Government, through J. P. Morgan & Co., has issued an inquity for approximately 20,000 railroad cars

about \$40,000,000 will be expended. To cover the construction of 3500 cars in Canada for the Russian Government inquiries are now in the market for 14,000 car wheels, 7000 axles and a large number of railway springs and special shapes. Orders for the bars, plates and shapes for this con-Although the New England roads serve struction have been obtained by the exercise of an option given some time

since by American mills. The Italian Government has again come into the market for steel bars and forgings, as well as for several thousand additional tons of alloy steel. Contracts calling for about 6000 to 7000 tons of steel for war munitions will probably be closed today.

The English and French Government requirements for shell steel are far from being satisfied, but there are few inquiries for specific tonnages now in the market.

In view of the sold-up condition of the steel trade and the inability of manufacturers to accept orders except for distant deliveries, the increase of nearly half a million tons in United States Steel Corporation's bookings in December was gratifying evidence of strong demand for steel

products. Iron Age says a great alertness is evident for signs of transition to a different condition in iron and steel. Consumers of finished steel, apart from plates and rails, hold off, finding FOR LAST YEAR little in the event to help them decide about purchases for second half, and such deliveries are as a rule the earliest large producers can give them.

Operating conditions are loosening in the Pittsburgh and valley districts. The Steel Corporation started five of its banked blast furnaces last week. and 11 in the week preceding. But the problem of coke supply and prices in the next three months is still formid-

HOME-PRODUCED SUGAR TAX IS PLAN PROPOSED

NEW YORK, N. Y .- The Federal

"In 1916 we consumed 3,658,607 tons of sugar," said the statement, "and tariff revenue of only \$38,000,000, 54 per cent as 1,977,118 tons of the total were untaxed domestic sugars. The tariff, however, cost the public \$84,500,000, or about \$4 a barrel on the amount consumed, the domestic beet and cane producers having pocketed the difference of \$46,500,000 by their selling price not on the cost of production, but upon the duty-paid value of foreign sugars refined here. Altogether more than, \$1,000,000,000 'pork' has been acquired in this manner by the beet and cane sugar grower of the country at the expense of the public."

Mr. Lowry said he favored taxing the domestic commodity one-half the present tariff rate, taking the Cuban rate as the basis. This would yield the Treasury \$23,250,000 a year in addition to the \$38,000,000 obtained on imports, he asserted, and would require the domestic sugar interests to turn over to the Government only onehalf their tariff profits.

SOUTHERN PACIFIC TAKES OVER ROAD

SAN FRANCISCO, Cal.-Arrangements have been made by the Southern Pacific company to take over the construction of the San Diego & Arizona railroad and to operate the line when completed. The amount involved in connection with the con-struction of the line is said to be \$15,000,000 and it is to be owned jointly by J. D. Spreckels and the Southern Pacific railway.

CANADIAN NORTHERN TORONTO, Ont. - Report of the Canadian Northern railway year ended June 30, which has just been issued, shows: Total operating revenues \$35,476,275, increase \$9,564,-

168, or 36.91 per cent over 1915. INVESTMENTS Trustees and Individuals Pingree & Co

DISCUSSIONS SET SPANISH CORTES BACK IN ITS WORK OF BARON HAYASHI

lays in Transacting Business-Issues Facing Government

MADRID, Spain-The Cortes is in sometimes rumors of crises, but they need not be taken seriously, even when cabled by news agencies, for the the Cortes is once more suffering from rized as follows: ter in the last Government, continully gives the most complete and patriotic support to the Premier.

A pleasant matter to contemplate is the Congress to grant the widow of 00 pesetas a year. Senor Figueras belonged to the most difficult of modern periods of Spanish politics, for he the Amadeus Monarchy most energet- rapprochement, and the hope is exically, and upon the abdication of the Italian prince, Señor Figueras became, for a brief period, President of the Re- vancement of cordial international reomed to failure, nevertheless, Senor nations. Figueras, like some of the other figures of the Republican set, was a man ITALIAN SHIPPING of high ideas, and some great ideals. After the restoration he retired to private life This vote of a pension to his widow is a graceful act on the part of the Spanish Parliament, and all the more so because of the fact

thousand unemployed workmen have just marched in procession through the streets of Madrid clamoring for work, and Spain, in parts, now has a lighting and shop closing order so that the apparent life of towns and cities is extinguished early in the evening. No Zeppelins soar above But again the people murmur that have invested in the new institution they might as well be at war, and the a considerable part of their own regreat Reformista leader, Melquiades serves. Previously there had been un-Alvarez, in a speech he has just made der discussion the possible formation at Alcoy, declares that it is well to by the Government, or with State aid, but that the future of Spain does not by a single shipping combine. It had terior, but on the line of battle on the be formed amongst the banks, headed otherwise than in accordance with Somme and on the Meuse.

GERMANY RAISES MAINTENANCE GRANTS

Special to The Christian Science Monito BERLIN, Germany - During the recent Reichstag cebates on the auxiliary service bill Dr. Helfferich was able to announce that the Federal Council had agreed to increase the maintenance grants accorded to soldiers' families. The grant to soldiers' wives is to be raised to 20 marks, and to all other relatives to 10 marks a month, the increase being reckoned from the beginning of November onwards. For the present the increased rate is to remain in force until the

THE CHILDREN'S PAGE

The Shops on the Avenue

As soon as she saw the bright sunshine she hopped joyfully out of bed and called to her mother:

We shan't have to stay in the house all day today, shall we. Mumsey?" "No, indeed," said Mother; "and that

ever so many errands to do this morn-

So as soon as breakfast was over, the dishes washed and the beds made, then for story-telling. the postman and the janitor and the an and the milkman attended to, Harriet and her Mother started out on their errands. Harrist carried her beautiful pink sunshade which Aunt Grace had given her, continues this interesting account of the daily doings of a little city child,--"About Harriet," by Clara W. Hunt. Mother carried her ng bag in one hand and that left the other hand free to hold Harriet's when they crossed the streets where automobiles and grocers' and

ers' wagons went whizzing by. It was not a long walk to the street ere the shops were. The errands this morning were not downtown errands to the great, huge department stores. Harriet's Mother wanted groceries and meat and fruit, not dresses and coats and shoes and furniture. There was a long avenue which had a row of all sorts of small shops down each side of it, and a trolley ran through the middle of the avenue.

Mother and Harriet stopped first at Mr. O'Rourke's grocery store. As soon as they went into the door, one of the clerks named Jans Jergensen came forward to wait upon them. Jans had very light hair and bright red cheeks. Harriet liked him very much, and he thought Harriet was the nicest little girl who came into the store.

ther ordered of Jans a dozen of the freshest eggs, two pounds of Mr. Mine is the loveliest by far! O'Rourke's best butter, a pound of seedless raisins, and three and a half to have the things sent over to her house until noon, because she did not expect to get home until then. As they started to go away, Jans went to a basket and chose the largest and pretfiest peach he could find to give to Harriet. Harriet thanked him very prettily, and Jans smiled a broad smile to see his little friend so delighted. .

The fruit store belonged to a darkhaired man who had come far across the great ocean and a great sea from the brave little country of Greece. In fact, most of the people who sold ler tale that the fathers and mothers of Mr. Sorakes's country told to their little children. Perhaps the reason why the shopkeepers like to wait upon Harriet's Mother was because she was to them about their faraway homes.

Mr. Sorakes's window always looked pretty as a flower garden. He knew ust how to arrange his dark-red cher- | eye of the bird it will be. les and pale-yellow femons, his rosyheeked apples and huge bunches of Harriet could ever count. She always stayed outside the shop while Mother ent inside, and she gazed into the reat glass window enjoying the colors nd trying to name the different kinds of things, but there was always some

new name to learn. Mother ordered a box of strawberies and a dozen of lemons from Mr. rakes, and then they went on to heir next stopping place.

Harriet always liked the bakeshop windows, but Mother seldom bought anything from a bakery. . . . This norning Harriet cou'd hardly tear herelf away from the bakery window, bese there was a huge wedding cake In the middle of it, and on top of the white frosted cake was a wedding

There were delicatessen shops, too, on the avenue, which Harriet liked. You could buy a whole cooked meal n one of these shops-a pot of baked eans, or a roast of beef, slices of cold ham, potato salad and other kinds bread and butter and pie and pickles and cheese and dough-The windows made a person hungry just to look at them, but here, either, except cream cheese.

lext they passed a cleaner's wineans a place where pedole take the kind of waists and dresses a tub of water, but which the cleaner can make look almost as good as new by some other ways of cleaning than!

There were only two more errands to do. One was at the branch post et wanted some ice cream from the States Department of Agriculture. da fountain part of the drug store, Houses for all other birds should be other said no, not in the morning and so near lunch time.

es and scissors; there were line, on one side, preferably about ry patterns to stamp on tow-napkins and tablecroths, on If there are not many s ths, on title girls' white dresses and ladies' starlings about, it will be better to their own renovation, but it is well to their own renovation, but it is well to make the openings in all the boxes, as the birds will do their own renovation, but it is well to make the openings in all the boxes, that one can get at the inside, if make the openings in all the boxes, that one can get at the inside, if make the openings in all the boxes, that one can get at the inside, if make the openings in all the boxes, that one can get at the inside, if make the openings in all the boxes, as the birds will do taken to be made by the importation of pepper, and so it came about that, up to as recently as 1861, Salem that one can get at the inside, if make the openings in all the boxes, that one can get at the inside, if make the openings in all the boxes, that one can get at the inside, if make the openings in all the boxes, that one can get at the inside, if make the openings in all the boxes, that one can get at the inside, if make the openings in all the boxes, that one can get at the inside, if make the openings in all the boxes, that one can get at the inside, if make the openings in all the boxes, there were knitting that one can get at the inside, if make the openings in all the boxes, there will be nat, and the only thing to take one can get at the inside, if the peper port.

The yield of honey last year amount that one can get at the inside, if the peper port.

Seashore and ladies' there are not many sparrows or their own renovation, but it is well to the

When Harriet woke on Tuesday and there were lots of other things. morning it was not raining any more. During the winters in the city Mother was too busy for fancywork, but there were long days in Maine when she had plenty of time to knit as well as to go picnicking and sailing and swimming; so that this morning Mother bought materials for making a whiteand-blue porch jacket for Aunt Maud.

At last all the errands were done is very fortunate, for you and I have and Mother and Harriet went home. After lunch . . . they sat on a Parkway bench once more until it was time for Father, and dinner, and

The Puppy's Opinion

She taught me that I mus'n't bark At little noises after dark, But just refrain from any fuss Until I'm sure they're not dangerous: This would be easier, I've felt, If noises could be seen or smelt.

She's very wise, I have no doubt, And plans ahead what she's about, Yet after eating every day, She throws her nicest bones away. If she were really less obtuse, She'd bury them for future use.

But that which makes me doubt the most These higher powers that human

boast, Is not so much a fault like that. Nor yet her fondness for the cat. But on her pleasant country strolls Her dull indifference to holes!

O, if I once had time to spend To reach a hole's extremest end. I'd grab it fast, without a doubt, And promptly pull it inside out, Then drag it home with all my power To chew on it in a leisure hour.

Of all the mistresses there are, Fain would I wag myself apart If I could thus reveal my heart. Mine is the saner attitude.

-Burgess Johnson.

And the child could only jump for

And on they went, climbing jey-

which stood the goatherd's hut). The

wind had swept the last trace of cloud

from the sky, which was of a wonder-

ful dark blue. The green Alp was

covered with blue and yellow flowers

and their wide-open petals seemed

Heidi scampered hither and thither.

shouting for joy. Now it was a group

of red primroses; one place was per-

fectly blue with lovely gentians; and

here and everywhere the tender blos-

soms of the yellow buttercups nodded

and laughed in the sunlight. Carried

away with delight by all the beckon-

ing, glistening flowers, the child for-

got the goats, and Peter also. Run-

ning now forwards, now back again;

first on this side, then on that side;

for here they were like red, and there

like yellow sparkles, and she was

tempted in every direction. Gathering

great handfuls of flowers, she stuffed

them all into her apron; for she must

carry them home with her, and place

"Now you have picked enough of

them in the hay in her bedroom, to

laughing back at the sun while every-

thing shimmered and shone.

joy, she was so delighted. . . .

good morning.

Heidi, a little Swiss girl, had gone to live with her grandfather, who was a goatherd and lived in a little hut for they can the goats, too, went in better order. for they scented the sweet herbs from which was perched high on a mountheir pasture on the heights afar, and tainside. She was greatly enjoying pushed forward without pausing her new life there and found it very The pasture where Peter usually different from that in the valleys be-In the following passages, from

stopped, and made his resting-place for the day, lay at the foot of the peak, whose base, covered with scrub trees and bushes, rose steep and naked towards the sky. On one side of the Alp the great rocks were divided by steep clefts and chasms. and the grandfather was quite right to warn them. . . . As they had now reached the high-

est point, Peter took off his knapsack, placing it carefully in a little hollow where it would be sheltered from the wind, which blew often in the pasture?" asked her grandfather. strong gusts up so high on the mountain. This Peter knew very well, and did not mean to see his knapsack. with the nice dinner, go rolling down fully up the Alm (the mountain on the hillside. Having put this in a place of safety, Peter stretched himself his full length on the sunny sod, to rest after the steep ascent. . .

After this Peter began to whistle and call so loudly that Heldi did not know what had happened; but the goats knew well enough, and all came running and jumping, and were soon all gathered on the green field. Some nibbled at the sweet grass, others ran here and there, while some stood opposite each other a little way apart. and butted playfully with their horns. Springing to her feet, Heidi ran in amidst the goats, for she found it a new and indescribable pleasure to see the dear little creatures gamboling together so happily; and she, too. jumped from one to another to make herself acquainted with each separately, for each had its own peculiarities. and looked and behaved differently.

While Heidi played with the goats, Peter had fetched the knapsack, and arranged the four parcels in a square on the grass, the big ones on Heidi's side, and the little ones on his; then he filled the mug with fresh milk from Schwanli, and placed it in the middle of the square.

Then he called to Heidi to come. but he had to call again and again. longer than to the goals; for the child was so delighted with the thousand movements and pranks of her new playfellows, that she saw and heard nothing further. Peter understood how to make himself heard. He shouted so very loud that he could have been heard up on the rocks, causing Heidi to run as fast as she could; and then the table looked so very inviting, that she hopped about

The Parson and the Clerk

There was once a parson who was such a bully that whenever he met anyone driving on the King's highway. he called out, ever so far off-"Out of the way! Out of the way! Here comes the parson!"

One day when he was driving along and behaving so, he met the King. "Out of the way! Out of the way!" he bawled a long way off. But the King drove on and held his own; so it was the parson who had to turn his horse questions which I shall ask you, you shall lose your office for your pride's

This was something quite different from what the parson was wont to hear, writes Gudrun Thorne-Thomsen in "East o' the Sun and West o' the Moon." He could bawl and bully. shout and scold. All that he could do but question and answer were not in his line. So he set off to the clerk. who was said to be worth more than the parson, and told him he had no mind to go to the King. can ask more than ten wise men can answer"; and the end was, he got the clerk to go in his place.

Yes, the clerk set off and came to the palace in the parson's clothes. There the King met him out on the porch with crown and scepter, and he was so grand he fairly glittered and gleamed. "Well, are you there?" said the King.

"Tell me first," said the King, "how "Just a day's journey," said the

"How is that?" asked the King. "Don't you know," said the clerk, "that the sun rises in the East and

ing in a certain way known to man sets in the West, and he does it just nicely in a day?" "Very well!" said the King, "but tell

"Well," said the clerk, "our Lord was valued at 30 pieces of silver, so

"All very fine!" said the King, "but.

"Oh!" said the clerk, "you are thinking it's the parson who stands before you, but there's where you are mistaken, for I am the clerk."

"Be off home with you," said the King, "and be you parson, and let him be clerk." And so it was.

The Butterfly and the Bee Methought I heard a butterfly Say to a laboring bee: "Thou hast no colors of the sky On painted wings like me."

Poor child of vanity! those dyes,

And colors bright and rare," With mild reproof, the bee replies, "Are all beneath my care.

"Content I toil from morn to eve, And scorning idleness.

To tribes of gaudy sloth I leave
The vanity of dress."

-William Lisle Bowles.

How to Make the Bird House

coes and verandas, while occasionally the smaller species by making the used by English sparrows and martins, opening 11/4 inches in diameter. are usually very ineffective, and, of nterested in their countries and talked | course, entirely out of place. The limb in the orchard, or the hole in the

The best materials to select in building bird houses are weathered boards, difornia grapes, his boxes of dates rustic cedar, or slabs of wood with lina wren, chickadee. the bark adhering, writes Arthur A. can be made very acceptable by cut- tree swallow. ting a hole of the proper size in one side, cleaning it out, and drilling a small hole in the bottom to drain off any rain that may beat in. Tin cans owl, purple martin. may be used, but should be painted or covered with bark to make them less unsightly. One end should be replaced by a block of wood, and the opening of the proper size should be made toward one edge of this or in one side of the can. Green bark of chestnut or other trees can sometimes be obtained and nailed into the form of a hollow cylinder. A hollow limb, a woodpecker's deserted nest, or a block of wood hollowed out in the form of a woodpecker's nest are all good devices, but usually it is easier to cut rough boards into the proper lengths and nail them together securely in the form of a small box. Sometimes boxes of the proper size, such as chalk

made, and require only some reinforcement. The exact size of the box is not very important, except that it should not yet so small as to give insufficient tother hardly ever bought anything room for the nest. A box should never be smaller than 3½ by 3½ by 6 inches, inside measurements, and it would be better to make it somewhat larger even for wrens. In putting up and skirts that cannot be washed in bird boxes for the first time, it would be well to make them of average size so-that they will be acceptable to the greatest variety of birds. In this way, ising soap and water. Even feathers the chances of attracting them are inand gloves and satin slippers are made creased. Such a box would measure to look fresh and new by these won- 5 by 5 by 12 inches with the long axis vertical. Fifty Years of Alaska

ON MARCH 30, 1867, while a violent political storm was enveloping his Administration, as a result of disagreement in relation to reconstruction in the South, Andrew Johnson, seventeenth President of the United States, and immediate successor of Abraham Lincoln, communicated, in the form of a message to the House of Representatives and the Senate, the astonishing fact that a treaty had been negotiated with Russia under the terms of which all of that nation's possessions in North America might be acquired by the United States. The only formality necessary to the consummation of the convention was ratification by the Senate. At the time, almost any act in which President Johnson and his Cabinet might have had a hand would have failed to obtain the commendation of the "Radical Republican" majority in Congress, and the purchase of Russian America was at first put down as a characteristic Johnsonian miscon-

ception of the needs of the country.

The United States, it was held by critics of the Administration, already owned more land than it knew what to do with. Vast territories beyond the Missouri were undeveloped, almost unexplored. Some of them were practically inaccessible; money was even then being lavishly spent upon the construction of a railroad across the Continent, an enterprise which, it was thought, would be likely always to be a drain upon the treasury, in the hope of bringing the Eastern into regular connection with the far-distant Western portion of the Republic; a huge debt, piled up by the Civil War, was exacting heavy taxes from the people; the times were dull, and with it all came this "foolish" proposal to pay the "enormous" sum of \$7.200,000 for an uninhabited and, as it was termed, probably uninhabitable area at the end of the earth, which Russia would no doubt gladly have parted with for

While the attacks on the Russian-American purchase were aimed at President Johnson, they were felt most keenly by his Secretary of State, William H. Seward, to whom the acquisition of the Territory was the realization of a long-cherished dream. As a variant for the phrase, "Johnson's Foolishness," the transaction with Russia was sometimes called "Seward's Folly." Nevertheless, calmer reflection, and able and eloquent advocacy by Senator Charles Sumner of Massachusetts, brought about the ratification of the treaty. Toward the close of his speech, touching on the name of the newly acquired possession, Sumner said:

As these extensive possessions, constituting a corner of the Continent, pass from the Imperial Government of Russia they will naturally receive a new name. They will no longer be Russian America. How shall they be called? Clearly any name borrowed from classical history or individual invention will be little better than a misnomer, or a nickname unworthy of such an occasion. Even if taken from our own history it will be of doubtful taste. The name should come from the country itself. It should be indigenous, aboriginal, one of the autochthons of the soil. Happily, such a name exists, which is as proper in sound as in origin. It appears in the report of Cook, the illustrious navigator, to whom I have so often referred, that he cuphonious name now applied to the peninsula which is the continental link of the Aleutian chain was the sole word used originally by the native islanders when speaking of the American Continent in general, which they knew perfectly well to be a great land. It only remains that, following these natives, whose places are now ours, we, too, shall call this great land Alaska.

And Alaska it was called. New Archangel, later known as Sitka, was the principal settlement under Russia. It long remained the principal settlement under the United States. Very little was heard of the Territory. after interest in its purchase subsided, until the gold discoveries on Klondike Creek, a tributary of the Yukon, on Aug. 16, 1896, or for nearly a generation after the signing of the treaty of purchase. Then there was a wild rush of prospectors, miners, and adventurers into the new country; villages, towns and cities sprang up over night, and within two years the Klondike region alone yielded more than \$10,000,000 in yellow metal. It is estimated that, to date, the mineral production of Alaska aggregates about \$350,000,000, but mine production constitutes but a single item in the Alaskan industrial account of the present day, A statement of the commerce of the Territory for one year, the last of which we have a full report, shows miscellaneous shipments, from the peninsula to the United States of a total value of \$27,-039,470. This is exclusive of shipments of gold and silver worth \$20,035,894. The value of the salmon product alone for a single year is almost equal to three times the price paid for the country:

After the transfer of the peninsula to the United States, Alaska was organized as a noncontiguous possession. It was made a civil and judicial district on June 6, 1900, and was organized as a Territory on Aug. 24, 1912. Its present capital is Juneau, where, in March, its Legislature will assemble for the third biennial session. The population does not exceed 75,000. Development along private corporate lines was arrested a few years ago, and now awaits the construction of a Government railway system, and an allotment of lands which will insure the possession of the country's resources to settlers. The Territory is one of the naturally richest sections of the earth, and is the only possession of the Republic, thus far, that has been held sacred for the benefit of the people.

The Norwegian Budget

THE Norwegian budget for the coming year, which was recently submitted to the Storthing, must be regarded as satisfactory in every way. For some time past, the Norwegian revenue has been larger than has been estimated; so that each working year shows a surplus income, as compared with expenses. Then, since the outbreak of the war, Norway, although she has suf-

fered many losses and, like all other neutrals, has had many difficulties to contend with, has, none the less, prospered financially and economically as a result of the struggle. Prices of imports have, of course, risen considerably, and this has inflicted hardship on certain sections of the community; but the greatly enhanced prices obtainable for exports, together with the enormous revehues which have been derived from shipping profits. have left the country as a whole very much better off than it was three years ago. The outstanding features of the budget are the comparatively large sums which have been expended on railway communications and education. In regard to the former, Norway has paid particular attention to this question, and the work of the State is being ably supplemented by the work of the municipalities. Roads and railways are being extended and improved, and a large part of the public debt is invested in these undertakings. As to education, it is interesting to note that, in spite of the present struggle. which extends to her very doors, Norway is spending almost as much upon education as upon her army.

Perhaps the most striking proof of the all-round prosperity of the country is afforded by the fact that Norway has funds to her credit which almost equal her own national debt. The United Kingdom and France have both issued loans in Norway amounting to kr.40,000,000 and kr.25,000,000, respectively; whilst Norwegian money to the amount of kr.350,000,000 is standing in British banks at comparatively high interest. The financial position thus disclosed is a remarkably sound one, and it is welcome to find that it is by no means wholly to be attributed to the special conditions brought about by the war. Good management and sound judgment in the matter of expenditure have long been characteristic features of Norwegian finance, and they have certainly not been lacking during the past two years.

General Lyautey's Work in Morocco

THE letter from M. Raymond Koechlin, published recently in the Paris Journal des Débats, in which he dealt with the remarkable work of General Lyautey in Morocco, has a special interest at the present time. M. Koechlin's letter was written before General Lyautey was summoned to Paris to take over the onerous duties of the French Minister of War; and it goes to show, in almost every line, why the General was chosen for his present high office.

Comparatively speaking, only very little has been heard of the military aspect of General Lyautey's work in Morocco. He has stood before the public, as no doubt he preferred to stand, as a great administrator, and as one who always desired to choose reform as a way to pacification rather than the sword. So the making of roads, the building of harbors, and the organization of great trade exhibitions and fairs have always figured prominently in the news from Morocco. The military accomplishments of the former Resident-General have, however, been little less remarkable than his civil achievements. On the first outbreak of the present struggle in Europe, there was a pronounced feeling in certain quarters in France that France ought to reduce her work in Morocco to a minimum; that she should be content with securing her various holds on the country, and not attempt anything in the nature of serious developments until after her tremendous work in Europe was accomplished. General Lyautey thought otherwise. He did not, however, make great demands on the Government at home for help. On the contrary, he permitted large numbers of men to be withdrawn from Morocco, whilst, with that curious genius which marks the great administrator, he succeeded in fashioning the tools wherewith to carry out his purpose from the material around him. He sent experienced officers back to France, and trained new ones. He employed territorial troops, established military stations all along the frontiers, and, especially in the south, placed outposts in all directions.

At the same time, he let it be clearly understood that his desire was, above all things, for peace and order, and that he only wished the native well. Force of arms was not resorted to, save when temporization was clearly a mistaken policy. Then when force had to be adopted, the operations were carried through with characteristic efficiency; whilst the whole military disposition was the work of a master hand. As M. Koechlin points out, in spite of the fact that border fighting has been going on incessantly since the beginning of the war, the unruly tribes have never been able to break through the rampart formed by the protecting troops, and the internal organization and development of the country have progressed without hindrance. Such a record, in the circumstances, is certainly remarkable.

Enforcement of the Poll-Tax Levy

New Orleans is congratulating herself, and she is to be congratulated by her less fortunate sister cities, because of her success in collecting the annual poll-tax levy. As the end of the last official year approached, those responsible for the financial affairs of that city underwent the usual apprehension that the year would show at least the average number of delinquents. But it appears that instead of maintaining or increasing the average, eleventh-hour payments brought the total up to almost 10,000 beyond the most sanguine expectations.

This condition of affairs, this apparent ability to deal with a perplexing municipal problem satisfactorily, must attract the attention of those cities where the percentage of delinquents, and the consequent loss of revenue to the municipal treasury, fo say nothing of the injustice upon those who pay the head tax regularly and more or less willingly, is larger than the percentage of receipts issued. Boston, as has been shown recently, stands near the head of the latter class of cities. Boston has, in the last twelve years, as has appeared, lost \$3,049,244 because of the failure to collect that amount of levied poll taxes. It would seem that the average citizen fails to hall as a patriotic privilege the duty of marching to the city treasury and depositing \$2, or even a smaller sum, annually, even when he is reasonably safe in

the assurance that he will derive at least corresponding benefits. But there may be cities in which this problem has not been solved in which those liable for the head fax seek to excuse themselves for their failure to pay upon the theory that they will not receive the corresponding benefits. Within recent years there has been much written, a great deal said, and something proved, regarding corrupt expenditures of money taken from the people under one or another of the different systems of taxation. One does not need to look far for excuses for. those who do not pay their debts. They are prolific enough in these. But it may be that the motive which decides, where there is no strong incentive, or compelling legal or other reason why failure to pay cannot be considered, is the belief that the tax is an unnecessary burden, the failure to pay which will deprive the delinquent of no civil right or social protection.

Theoretically, in most states and cities, the right to vote can at least be challenged for failure to pay the annual head tax. In New Orleans this condition is much more than a theory. A male citizen there cannot vote until he is registered and has been provided with a registration certificate, and he cannot be registered without producing a poll-tax receipt. A citizen there is automatically disfranchised for two years in case of failure to pay, within the calendar year, the tax levied against him. His delinquency cannot be wiped out by subsequent payment, until the full two-year period has elapsed.

In circumstances such as those cited, the great majority of qualified electors would, no doubt, prefer to pay rather than suffer disfranchisement, no matter what their scruples or doubts regarding the right of the city to levy the tax, or the honesty and integrity of those charged with the duty of expending the money for the benefit of the public

benefit of the public.

And yet it may, perhaps, be as reasonably maintained that regulations which tend to preclude those otherwise qualified to vote from exercising this privilege are not conducive to democratic government. But, sooner or later, it would seem, the conclusion must be reached that, in those cities and states where the levying of this tax is authorized, there must be regulations which will make its payment virtually unavoidable.

The Fascination of Politics

POLITICS comprise the greatest of all games in a democracy. In no other department of peaceful human activity is there so much scope for the display of leadership and generalship. Often in politics, millions are under the control of one man. Politics represent a game in which there is a part, and an interesting part, for everybody. Those who decry politics in a wholesale, sweeping way lose sight of the fact that, in a democracy, politics constitute a prime essential. Without politics there can be no party government; without party government there can be no effective expression of popular sentiment. The wise thing is not to underrate or in any way belittle politics, but, on the contrary, to strive for the improvement of political methods, and for the advancement of political ideals. Political activity is wholesome. In the United States it is no less everybody's privilege than it is every good citizen's duty to take an interest and play a part in the game of politics.

A prominent Western business man was once upbraided by some of his associates for giving so much of his attention and time to political affairs. It was held, by some of his friends; that politics became the business of politicians. "Not so," said the business man referred to. "Politics should be the business of the American citizen. If there is anything wrong in politics, you, who think yourself above politics, and not the politicians, are responsible for it. Politics should command the closest and most earnest attention of all worthy citizens, because politics are the source of power in a republic, and if the source be corrupt the Government is sure to be so."

There was another business man of equal prominence and clear-sightedness who, in like circumstances, said: "Yes, I like politics, and I'll tell you why; because it is something in which 99 per cent of the inhabitants of the United States are interested. Some people take to one thing, some to another, but all take to politics. Walk about the street and talk to Tom, Dick, and Harry. Tom will talk shop, Dick will talk golf, Harry will talk baseball; you can turn any one of them, in a twinkling, to talking politics."

There is, perhaps, no more experienced political observer and campaigner in the United States than Chauncey M. Depew, who is prominently identified with the New York Central Railroad. He has been in the thick of politics for half a century. He is as deeply interested today as ever in the greatest of games. Speaking in New York, one evening recently, he touched, eloquently as usual, upon what he called the fascination of politics in the best sense. "There is a general abuse of party organization and party leaders and bosses," he said, but the prizes are so great in government, national, State, municipal and town, that politics will always attract a section of the public. This section of the public becomes expert and professional. They may occasionally drop into obscurity, but never into oblivion. We rarely consider that practically all we care for and all our opportunities for enjoyment or for success in, life are dependent upon the Government which we make and control." And he added:

The study of the origin of parties in our own country and the lines upon which they have generally divided goes down-to the very roots of our existence. It illustrates again the continuous power of masterful creative genius and the grip of the hand of statesmanship that cannot be loosened.

Dr. Depew was always a popular politician, because in the heat of a campaign he could believe, and he could, and often did, express the belief that, although the other side was utterly and hopelessly wrong, yet there was a possibility that it might be sincere. Also he could make as good a speech on election night in accepting defeat as he could in announcing victory. Like many others prominent in political activities in the United States, he did not, while "in the harness," hold to the conviction that

all good men were Republicans and all bad men Democrats. In short he was, and for that matter is yet, of the type that gets the most out of politics. When an election is pending it is a wholesome indication of national alertness and virility for the people to be aligned in opposition, for the worst thing that could come to a republic would be the indifference of the people to public affairs. When the election is in doubt it is a wholesome indication that the public is intensely interested in knowing the result. When the election is over it is a wholesome indication that the great mass of the people accept the result cheerfully and go about their usual occupations, forgetting, as speedily as possible, whatever may have occurred in the campaign to wound their sensibilities or to disappoint their expectations.

Notes and Comments

In his interesting but curiously unequal book, "Great-Victorians," published recently, T. H. S. Escott draws attention once again to the somewhat pedantic punctiliousness of both Lord Palmerston and Lord Granville in matters of detail. "Every department of State bad, from Lord Granville's point of view," Mr. Escott writes, "its domestic idiosyncrasies. These, he thought, should be stamped upon its official arrangements down to the smallest detail. Herein he resembled Palmerston, who, on going to the Home Office in 1852, insisted on the dispatches being folded differently from the Foreign Office fashion. So Lord Granville, migrating to the Privy Council Office in 1853, introduced an entirely new ribbon for tying up papers."

MR. Escort's style is an interesting survival. He is, of course, writing from an intimate, first-hand acquaintance with the period with which he is dealing, and it is, therefore, not surprising that he should, as one writer has expressed it, "glorify the style of the old Daily Telegraph," and make use of nearly all the catch phrases of the Victorians. Most of them are, however, banal enough from repetition. "The Rupert of debate," "the sage of Chelsea," and so on, are indeed, today, depreciated literary currency.

It is officially estimated that there has been an increase of 150 per cent in the number of sailors among United States citizens since the beginning of the European war. If this increase continues, the calling of able seamen may regain something of the prominence in the country which it had in the days of clipper ships.

What is the remedy for the vast accumulations of wealth that control the real estate of whole sections, and usually the choicest, of the great cities of the United States? The Chicago Tribune thinks that the imposition of an inheritance tax, so graduated that no family or group of families can ever accumulate so much property "as to destroy the fact of our republic" will solve the problem. It might help to do so, but does not the remedy really lie in the imposition of a single tax, and that on land values? If a better remedy is known it is time that it was being brought forward, for nothing is plainer than that a remedy is needed.

PEOPLE who live thousands of miles from Nevada will, for the next few months, keep a weather eye on the thriving little city of Reno, to watch the results which the present grand jury, three of the members of which are women, will achieve. These three women, from all accounts, stand high in the community. They are women who know what conditions are in their home city, and, it seems, brave enough to speak their convictions. If there are social conditions there, as in most cities, which need more thorough investigation and more light than they have received at the hands of the men, these will argue strongly for universal suffrage, and for better government, if the tacit policy of condoning those things which we refuse to see is forgotten.

THE memorandum signed by 135 members of the senate and sent to the vice-chancellor of Cambridge, recently, marks an incident in the life of the great English university which is likely to become historic. The memorandum urges the senate to take into consideration at once the changes likely to be necessitated after the war is over, and mentions the possibility of establishing a more economical standard of living. This question is, of course, especially interesting. In the Middle Ages, impecuniousness was regarded as an inevitable and honorable badge of studentship, and, whilst this is in the last degree undesirable, the great universities have for a long time past tended too much in the opposite direction. A university should, as far as possible, be available to all purses.

Some of the great industrial concerns of the United States are obtaining options on the sand-dune region of Northern Indiana. It is said that 1500 acres passed into the possession of the Bethlehem Steel Company not long ago, and that another tract of 3000 acres has since come into the control of the same interests. Meanwhile the states of Indiana, Michigan, and Illinois are appealing to the Federal Government to make the sand-dune district a national park reservation. That is, they are losing valuable time, and perhaps a priceless opportunity, in striving to have the Nation do what they should do themselves. This looks like a case of "pork" and procrastination.

SOUTH AMERICA seems to be full of surprises. Not the least of these is the discovery, by a visitor, that the thousand newspapers of Brazil are, as a whole, singularly free from sensationalism. Whether this is because the Portuguese language does not readily lend itself to flaring headlines and exaggeration, or because the publishers have too much consideration for the intelligence of their readers to descend to "yellow" journalism, is not stated. The probabilities would, however, seem decidedly favorable to the latter theory.
